### WHY HIRE ME

- Reliable. If you need me, I'll be there man.
  - Malleable. Willingness to do/learn what's needed.
  - Adaptable. Improvise, and overcome. Never panic.
  - Affable. Easy to get along with. Fun times.
- 

### SUMMARY AND OBJECTIVE

Former mathematics teacher returned to the code. Self-taught grinder. I'm confident that my dev skills are on the level, but I'm always improving and eager to learn more. Oh, and did I mention I love math? I'm looking to join a squad of problem solvers, innovators, and risk takers (given sufficient data, of course), but mostly just cool happy people. Over the past few years I've worked with a variety of languages, libraries, toolkits, etc. React, Node, AWS, GraphQL, Serverless, Python, and a little GoLang to name a few. My weakness is design, but I'm getting better. I'm a left-brained individual, no doubt. Overall though, I'm just a curious, fun, easy going dude, whom you'll love having on your team.

**B.S. Mathematics** - *University of Utah, 2009*
